

## APA Group's Mondarra Gas Storage Facility

### PROJECT DETAILS

**Location:**

Western Australia

**Client:**

Enerflex

**Role:**

Sub-Contract Service Provider

### Project Overview:

APA Group's Mondarra Gas Storage Facility Project (MSF), located approximately 25 km southeast of Dongara in Western Australia, involves the expansion of the existing storage facilities through the drilling of additional wells into the sub-surface reservoir, and the construction of a new compressor facility and gas treatment plant with supporting infrastructure. This new, expanded facility will provide an increased gas storage and gas supply capability to improve WA's energy security, as well as providing major gas users with additional options to improve flexibility and to manage their gas supply portfolio.

### Scope of Work:

APTS was awarded all Hydrostatic/Pneumatic Testing, Line Drying and Line Blowing of APA Group's Mondarra Gas Storage Facility Project, this also included Pipe Line Testing & Pigging of the Import & Export Lines.

Systems in the package included — Gas Compressors, LP Flare, HP Flare, Silica Gel Gas Conditioning, Process Gas Import & Export Lines, Fuel Gas, Lube Oil & Utilities (Instrument/Plant Air, & Service Water).

### Services Included:

Hydrostatic Pressure Testing, Pneumatic Pressure Testing, Line Blowing, Line Drying, Pipe Line testing, Pipe Line Pigging, Flange Management, Punch Listing, Re-Instatement & Pre Commissioning activities.
