

“ Industry specialists delivering accurate and timely calibration. ”

INSTRUMENTATION, CALIBRATION & SALES

Our APTS Calibration & Sales team understand that clients need a fast and efficient service. We always aspire to have your equipment tested and calibrated as quickly as possible, while maintaining consistently high standards of work.

Ensuring instruments are calibrated accurately requires a high level of expertise. APTS proudly ensures that every job conducted meets the stringent International and Australian Standards and we provide no less than NATA endorsed certification.

Our strategic alliances with preferred instrumentation manufacturers and distributors ensure APTS supplies customers with the best quality products in the shortest possible timeframes.

APTS calibration capabilities extend across Australia, with services conducted from both our Western Australia and Queensland branches.

“ *Employing skilled personnel aligned with our values to provide service excellence.* ”

APTS Calibration Services include:

- **Hydraulic calibration and repair of test and industrial grade pressure gauges**
from 0 to 400MPa (58,000 psi)
- **Pneumatic calibration and repair of test and industrial grade pressure gauges**
from -95KPa (Vacuum) to 10MPa (1450psi)
- **Calibration and repair of pressure chart recorders**
from -95KPa (Vacuum) to 400MPa (58,000psi)
- **Calibration and repair of torque gauges**
equivalent to 0 - 58,000psi
- **Calibration of pressure transducers with reader**
from -95KPa to 400MPa (58,000psi)
- **Calibration of temperature chart recorders and RTD / Thermocouples with reader**
from -30 to 180 degrees celsius (traceable only).

Contact APTS today on 08 9412 1500 or calibration@apts.com.au to find out more about our Instrumentation, Calibration & Sales.
