

“ Delivering the results you need first time, every time. ”

HEAT EXCHANGER SERVICE

Our local APTS Service Centre in Henderson, WA has the equipment and staff to provide a fully inclusive Plate and Tubular Heat Exchanger service.

APTS services include the complete refurbishment of all makes and models of Plate Heat Exchangers, with a complete return to original design specification and performance.

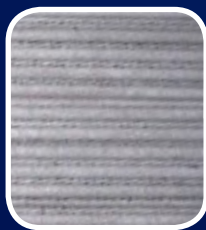

APTS offers Expertise – Quality Procedures and equipment to perform chemical cleaning on a variety of heat transfer equipment including Plate, Boiler, Condensers, Evaporators, Lube Oil Coolers, Charge Air Coolers as well as their associated feed lines.

APTS also offers in-situ cleaning and a complete comprehensive in-house Refurbishment Program, with a wide range of chemical cleaning skids consisting of pumps, break tanks, pipes, valves, filters and hoses that can be mobilised to site or set up in our Henderson facility.

The long term performance of heat exchangers can be greatly increased and the risk of plate and tube corrosion or failures can be reduced by implementing routine cleaning and servicing.

Before

After
