NON DESTRUCTIVE TESTING (NDT)

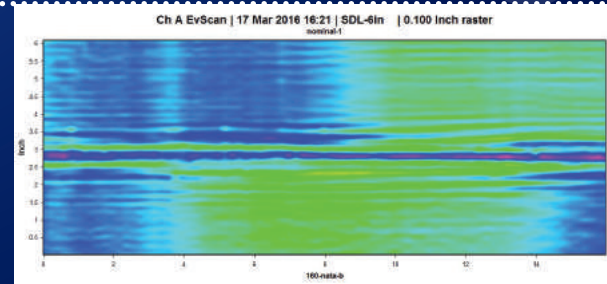

EXTENSIVE IN-SERVICE AND PROJECT NDT

Providing leading industry capabilities with an extensive range of in-service and project NDT inspection, including but not limited to X-Ray, Gamma Radiography and UT. APTS also offers Plant and Coatings Inspection and maintains a strong focus on planning, timing and execution.

MICROWAVE NDT of NON-METALLICS

Innovative materials require innovative technologies. Our exclusive interferometric techniques, combined with world leading in-situ testing and expertise provides a solutions based approach to non-metallics asset integrity.

OPTIMISED TO SUIT OUR CLIENTS' NEEDS

Eliminating the requirement for film storage, APTS can provide digital radiography utilising Shawcor's Real Time Radiography system (RTR), complementing our conventional X-Ray and Gamma Radiography. We also offer the option of automated ultrasonic testing (AUT) where radiography is not an option. Our independent mobile darkroom capabilities allow for on-site processing and assessment.
